过完春节过春糖

THE 114th CHINA FOOD & DRINKS FAIR

The 114th China Food and Drinks Fair

Mar 26th-28nd,2026

Preface

Dear exhibitor friends:

We sincerely welcome you to the 114th China Food & Drinks Fair!

The 114th CFDF will be held in Chengdu from March 26 to 28, 2026. Following the established "One City, Two Venues" model, the Fair will be concurrently held at the Western China International Expo City and the New Century Global Center. In the meantime, a series of "Spring Sugar Festival" activities will be launched throughout the month of March, integrating resources of accommodation, catering, transportation, tourism, shopping, entertainment, culture, business and tourism across the city to construct diversified consumption scenarios. This initiative aims to build a 10-billion-level urban consumption season and stimulate the regional economy through the driving force of the exhibition.

With the theme of "After the Spring Festival, Embrace the Spring Sugar Fair", the Fair takes advantage of Chengdu's "Three Cities and Three Capitals" development strategy, innovates industrial docking scenarios through diversified forms of "Exhibition, Conference, Competition and City", and strives to build a highland for the industry's debut economy. With a total exhibition area of 325,000 square meters, the Fair sets a new record in scale, further consolidating its position as "the world's largest comprehensive exhibition for food and beverages". It is estimated that more than 6,600 domestic and foreign food and alcohol enterprises will participate in the Fair, and the number of visitors is expected to exceed 500,000, leading global food and alcohol exhibitions for seven consecutive years.

To achieve full coverage of the industrial chain, the Fair has set up 12 major exhibition zones and 26 special zones with precise and complementary layouts: the New Century Global Center focuses on alcohol and beverages, including zones for Famous Chinese Liquors, International Wines & Spirits, Beverages & Dairy Products, and Alcohol Packaging Supply Chain; the Western China International Expo City focuses on the food industry, covering sectors such as Leisure Food, Condiments & Ingredients, Green Agriculture, International Food, Food Machinery, and Food Packaging Supply Chain. A special area for the "Private Domain New Channel Sourcing Conference" is specially set up on the second floor of the Western China International Expo City.

We wish you a smooth work and pleasant life in Chengdu, and a rewarding and fruitful experience at this session of the China Food & Drinks Fair!

Best Regards !

CFDF Organizing Committee
February, 2026

Salutatory

Welcome to the 114th China Food and Drinks Fair(CFDF)!

We have compiled the exhibitor manual for the 114th China Food & Drinks Fair to help you make preparations for the fair. We Exhibitors and service providers are advised to read the manual carefully and comply with the requirements and application deadlines.

Our services include the following categories:

- 1.Exhibition Schedule
- 2.Standard booth information submission, clean booth layout, exhibition withdrawal
- 3.On-site services and goods transport, rental
- 4.Exhibition information catalogue service
- 5.Relevant information and declaration process
- 6.Supporting Service Information

To apply for various services, you only need to log in the official website of the CFDF to register, fill in and sign the required documents and relevant forms after sealing, upload to the host service provider, please keep the backup of the transmitted form.

We will build "the international stage of food economy and the window of wine industry culture" for you with sincere and high-quality service. Let you return home at the 114th CFDF with a rewarding trip! We are looking forward to your arrival.

Wish you success at the CFDF!

CFDF Organizing Committee

Regulations On Exhibition Management

2-1.General Provisions

- (01) In accordance with the relevant regulations of the laws and regulations of the People's Republic of China and relevant government agencies, the general provisions have been revised for clauses and requirements including but not limited to safety production, fire safety, and document management. Exhibitors, booth builders, and service providers are required to strictly abide by them.
- (02) The overall layout of the booths is unified and planned by the organizing unit.
If the organizing unit deems that changes in the layout or location of the corresponding booth are advantageous to the exhibition, it has the right to make adjustments to their distribution.
- (03) Exhibitors are not allowed to transfer or sublet part or all of their booths. The actual user of the booth must be the exhibitor who has signed the "Exhibition Contract" with the organizing unit.
- (04) Before the end of the exhibition, all booths and exhibits must be in normal exhibition and operation status, and the exhibition cannot be ended prematurely for any reason.
- (05) The exhibitor's enterprise name and booth number must be clearly marked on the booth. The content of the marking must not violate Chinese laws and regulations or relevant exhibition regulations.
- (06) Booths must be clearly divided according to the area specified in the contract, and the booth structure must not exceed the agreed boundaries; if there is any violation, the organizing unit has the right to request rectification and bear the relevant costs.
- (07) Exhibitors are not allowed to display, hang, or distribute any items outside their booth boundaries.
- (08) To ensure the overall visual effect, the structure and layout of the booths should be considered to avoid obstructing the view of other booths. The principle of the main channel booth is to ensure that there are no obstructions on both sides, and it is not allowed to obstruct the view of adjacent booths on the same visual surface. The construction structure must not exceed half the depth of the booth.
- (09) All booths must ensure integrity and aesthetics, and at the same time comply with the quality standards and safety standards of the organizing unit and relevant government departments; if there is any violation, the organizing unit has the right to request rectification and bear the relevant penalty costs.

2-2. Basic Instructions for Exhibition Areas

To ensure the success of the 114th China Food and Drinks Fair (hereinafter referred to as "CFDF"), to protect the exhibitors and viewers property and ensure personal safety, and to prevent fire accidents and personal injury and mortality, we hereby release the exhibition area safety and fire control rules:

- (01) Exhibitors and booth construction companies shall strictly observe the People's Republic of China Fire Control Law, the Code for Organs, Organizations, Enterprises and Institutions' Fire Control Safety Management, as well as the Safety and Fire Control Rules of the International Expo, shall designate officers in charge of fire control and safety, and enter into a related commitment with the CFDF organizing committee.
- (02) Decoration and construction of booths shall conform to the safety criteria, and before decoration, the booth decoration plans, drawings and materials shall be reported to the organizing committee for examination. After all the booth decoration and construction plans have passed the examination and been acknowledged to be up to standards, the decorating and booth construction companies shall sign the raw space booth construction safety and fire control safety commitment with the CFDF organizing committee before going through the formality of launching construction of the booth. Custom built stands shall have two or more outlets in addition to fire passages and the main passage. Booths located at emergency openings shall have an open design, and no wall or block shall be designed or located at the fire passages, freight doors or fire exits so as to keep these passages open. Exit instructions, warning signs and no-smoking signs shall be affixed at these places.
- (03) Smoking or the bringing into the exhibition area of any flammable or explosive object or pet is absolutely prohibited. Fireworks, including cold fireworks, are prohibited. The materials for booth decoration must be made with non combustible or fireproof material. Any combustible, poisonous or harmful material used for decoration is absolutely prohibited. If it is really necessary to use any combustible material, it shall be processed to be fire-proof as required.
- (04) The booth shall be equipped with a certain quantity of fire control appliances based on its size. Exhibitors may bring fire extinguishers themselves or rent them at the location designated by the CFDF organizing committee. Fire extinguishers brought by the exhibitors shall be examined and approved by the exhibition area's fire control team.
- (05) Any unauthorized circuit connection, installation of spotlights or sunlamps or the like, use of canned liquefied petroleum gas, gas stoves, or electric heating appliances is strictly prohibited.
- (06) Any dangerous work with open fire, cutting, polishing, gas welding, electric welding, spray painting and benchtop electric saw operation are strictly prohibited.
- (07) Electrical workers declared in advance must match the actual operators on-site responsible for connecting all electrical appliances (including but not limited to distribution boxes, lamps, sockets), and their certifications must be checked. Lighting fixtures, neon lights, various electrical facilities, and materials must have national

professional safety certification. Ballasts must not be installed on combustible materials. Standard double-insulated flame-retardant cables must be used to connect electrical equipment, and other forms of cables are strictly prohibited. The electrical load of the booth must not exceed the total load of the connected distribution box. The installation of electrical circuits must comply with the " Technical Code for Safety of Temporary Electrification on Construction Site", and the actual electrical load of the booth must not exceed 80% of the total load of the connected distribution box.

- (08) All construction workers shall duly fasten his/her safety belt, wear a safety helmet, and use safe lifting tools and platforms for on-site operations or for work at height. The construction site shall have a safety supervisor responsible for the safety of the booth's construction. Any booth construction companies breaching any safety rules will be required to make rectification by the organizing committee in accordance with the applicable rules.
- (09) Hanging or hoisting any booth structure onto the net rack at the ceiling of the exhibition hall is strictly prohibited. Setting up a booth or piling up anything under the fire resistant rolling shutter door, in the public fire passage or within the area signed with yellow lines, or covering up, burying, occupying or blocking any fire control facility or equipment (fire extinguishers, fire hydrants, infrared sensor, automatic fire extinguishing system and its pipes, all sorts of shutter doors, emergency exits, detectors, fire passages, etc.) of the exhibition hall is strictly prohibited.
- (10) Dismantling, removing or damaging any facility or equipment of the exhibition hall is strictly prohibited. No booth construction company is allowed to use the power distribution box, water source or any other fixture of the exhibition hall without permission.
- (11) Dismantling, removing or damaging any facility or equipment of the exhibition hall is strictly prohibited.No booth construction company is allowed to use the power distribution box, water source or any other fixture of the exhibition hall without permission.Unauthorized opening of manhole covers inside the hall is prohibited. Hanging structural load-bearing objects on facilities without permission is prohibited. And blocking, burying, or occupying firefighting facilities and equipment is strictly prohibited.
- (12) Prohibitions on Aiming or Proximity of Heat-Generating Devices such as Spotlights to Fire Sprinkler Devices.Bringing balloons, drones, and other unapproved items into the hall is prohibited.Smoking is not allowed in non-designated areas.Stacking flammable materials such as empty cardboard boxes inside booth storerooms is prohibited.
- (13) Related CFDF management staff shall have the right to require any exhibitor or constructor breaching any of the above rules to stop operation, rectify their misdoings or errors immediately or within a time limit. Those who fail to abide by such managerial instruction will have their eligibility for CFDF and for booth construction canceled, and will be transferred to the police. Any safety-related accident, liability, or any economic loss resulting from said breach of this rule will be assumed by the concerned exhibitor and constructor in full.

Sanitation Rules

- (01) During the booth construction period, any packaging, waste, debris or the like shall not block the aisles in the exhibition hall. Every day upon finishing the day's work, the constructors must clear out their waste and rubbish.
- (02) During the CFDF session, the exhibitors shall perform cleaning of their booths by themselves, and the Fair will only provide cleaning for the public area; any rubbish other than that of the public area, and any exhibit or exhibition furniture in the booths shall be cleaned and maintained by the concerned exhibitors.
- (03) During the CFDF session, the exhibitors shall clear up and carry their own rubbish to the designated place by the close of the venue every day. Do not pile any rubbish in the aisles or in the public area.
- (04) During the dismantling period, the exhibitors and the constructors' persons in charge must clear out all their material at the venue as per the "CFDF Schedule". DO NOT operate wildly, DO NOT pile up the dismantled material in the freight aisle, and DO NOT discard any dismantled material in the periphery of the venue. After the clear-out, the venue sanitation supervisor and the official service provider's sanitation supervisor shall sign their acknowledgment of such in a timely manner.

Provisions on Intellectual Property Rights

- (01) All parties shall strictly comply with the provisions of the Food Safety Law of the People's Republic of China, the Advertising Law of the People's Republic of China, the Trademark Law of the People's Republic of China and other relevant laws and regulations. The exhibits shall conform to the requirements set forth in the relevant national and industry standards, no counterfeit, substandard or infringing exhibits shall be exhibited, and no articles involving dangerous factors or other illegal items shall be carried into the exhibition areas.
- (02) The Instructions for Participation in the 114th China Food and Drinks Fair, Letter of Undertakings of Exhibitors of the 114th China Food and Drinks Fair and other relevant management rules of the China Food and Drinks Fair shall be strictly complied with.
- (03) During the exhibition, exhibitors must carry relevant intellectual property documents. If complaints about relevant intellectual property rights documents carried into the exhibition areas during the exhibition and owned by exhibitors are received, the exhibitors shall take the initiative in cooperating with the organizer of CFDF and the competent IP rights administration to carry out the relevant activities. If IP rights issues are identified, reports may be made to the Administration Service Center or Complaint & Reporting Center set by the organizing committee. Any commercial promotion activities may only be conducted in the concerned exhibitor's own booth. Taking any photos or videos in any other exhibitor's booth without permission is strictly prohibited.

Food Safety Rules

Catering services during the CFDF are provided by the venue. Food safety shall be

第114届全国糖酒商品交易会
THE 114th CHINA FOOD & DRINKS FAIR

managed by both the local market supervision and management department and the CFDF organizing committee. Please feel free to use it. If food safety problems are caused by the selection of non venue catering, please bear the consequences. For the sake of your health, please be sure to choose the official catering.

Rules for Large Luggage Storage Service

In order to ensure the exhibition order, protect the rights and interests of all exhibitors and the safety of exhibits, and resolutely crack down on behaviors in violation of regulations such as unauthorized vendors, mobile advertisements, and ticket scalpers, a baggage deposit will be set up at China Food & Drinks Fair to provide free storage for luggage and large items for attendees. Participants of the CFDF are requested to consciously observe the rules. If repeated warnings are ignored and it results in negative social impact, the fair has the right to request the local police administration department to handle the situation in accordance with the law.

The specific measures are subject to the relevant notices and announcements before the exhibition.

(2) Introduction to Access Management System

- This fair implements "One Person, One Badge" real-name access control system. All personnel are required to undergo real-name verification when registering and submitting information in the system.
- All professional visitors who have successfully registered on the official website of the fair (www.qgtjh.org.cn) or the WeChat mini program can enter the venue directly at the access control gate by verifying their registration on the electronic interface, or they can obtain a professional visitor badge for free at the exhibition site and enter after verification at the gate. Visitors who have not pre-registered need to purchase a ticket with their real name (Note: The credentials for this session of the fair are only used as admission tickets, and all individuals need to swipe their ID cards for verification at the access control gate to enter).
- The access management has a registration area. All personnel must enter the registration area with the relevant certificates or visiting tickets issued by the organizing committee, and then swipe their ID cards through the gate for verification to enter.
- Visiting tickets can be purchased on the WeChat official account (cfdfnews) of the fair or at the on-site ticket office.
- PRE-REGISTRATION can be applied for free in advance on the official website of the Fair (www.qgtjh.org.cn) on the "Professional Visitor Pre-registration" page or on the WeChat official account (cfdfnews). Applications will not be accepted during the exhibition period.

03

Exhibition Services

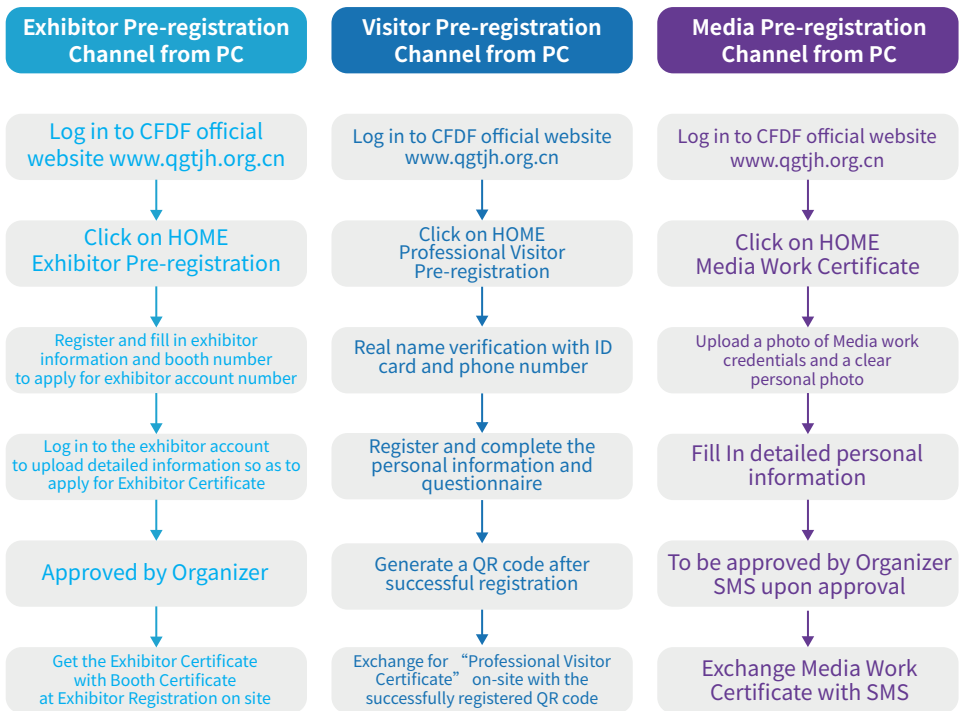

3-1.Pre-registration service

Exhibitor pre-registration, professional visitor pre-registration, and invitation.

In order to provide better and more convenient services to exhibitors and participants, the official website of the China Food and Drinks Fair (www.qgtjh.org.cn) has opened the "Exhibitor Pre-registration Channel", "Professional Visitor Pre-registration Channel" and "Media Pre-registration Channel", which respectively provide the following services:

- Exhibitor pre-registration channel: exhibitor information registration, fascia information submission, exhibition publications information submission, application for exhibitor card, invitation of professional visitors, assistance with professional visitor registration.
- Professional Visitors Pre-registration Channel: Pre-register professional visitors information, apply for "PRE-REGISTRATION" (enter with ID card).
- Media pre-registration channel: Media personnel information registration, exchange for media credentials on-site after approval(enter with ID card).

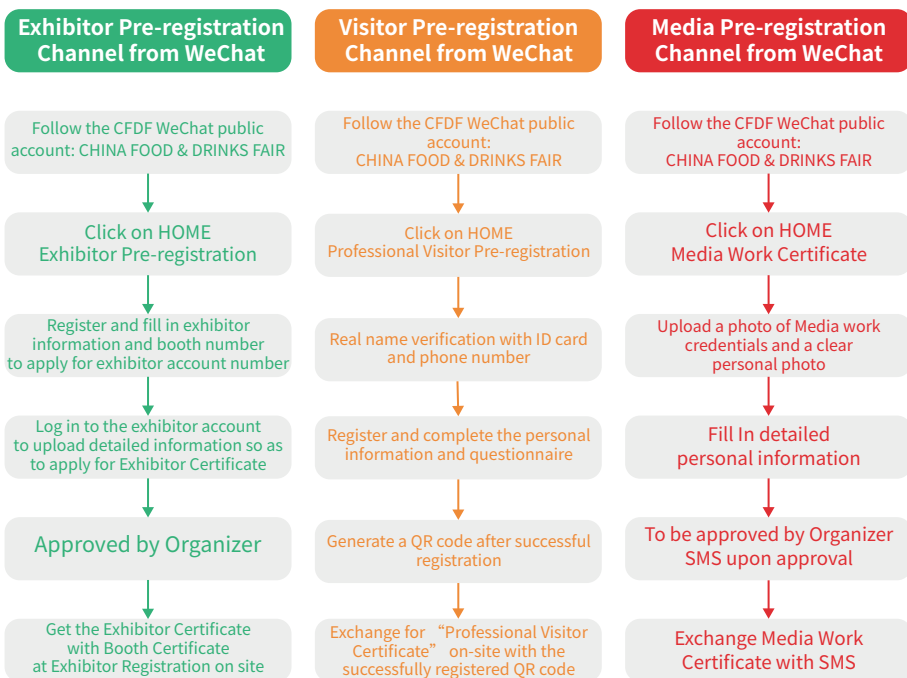

All tickets/certificates of this exhibition are not used as admission vouchers, and one shall swipe personal ID card to enter the exhibition.

At the same time, the WeChat platform of the CFDF has also opened a pre-registration channel; personnel can pre-register through this channel and obtain their certificates on-site by swiping their ID cards for entry. One can also enter without exchanging the certificate by swiping a personal ID card.

The Exhibitor Pre-registration Channel is the only reliable way to apply for an “Exhibitor Certificate”, submit fascia board information and exhibition publications information. This system also supports registration for inviting professional visitors.

Professional visitors who have already registered and applied for a “Professional Visitor Certificate” can swipe their ID cards to enter and exit the exhibition area during the specified period (within a limited number of times). Audiences who have not pre-registered need to purchase a “Visiting Ticket” on-site and swipe their own ID card for entry.

All tickets/certificates of this exhibition are not used as admission vouchers, and one shall swipe personal ID card to enter the exhibition.

3-2. Business Matching Services

Business Matching Services

Leveraging the comprehensive inquiry resources from all expo visitors, we build a precise customer acquisition channel for exhibitors. Our service efficiently matches purchasing demands and facilitates business cooperation, helping you achieve the core goal of "Transactions First!"

Full-Range Inquiries & Precise Buyer Matching

We have access to genuine inquiry demands from professional buyers. Through pre-show contact and appointment matching activities, our dedicated team will specifically match you with highly compatible buyers and provide one-on-one docking services.

Exclusive Business Matchmaking Services for Efficient Conversion Rate Improvement

- Online targeted push of high-value buyer leads for precise access to target customer groups, reducing customer acquisition costs
- One-on-one meeting scheduling and coordination for buyers to enhance booth negotiation efficiency, adding value to every reception
- Post-exhibition exclusive business opportunity reports and continuous follow-up services to extend cooperation beyond the exhibition

Optimize Your Store Display = Increase Exposure & Seize More Business Opportunities

Uploading richer product introductions, categories, and cooperation information can significantly increase your exposure weight in the buyer matching pool. This ensures your products are seen first by precise buyers, giving you a head start in business matchmaking!

One-click operation on the mini program for efficient response to invitations.

Log in to the official mini program of the National Food and Wine Fair, click [Business Opportunities] to view all procurement needs, and click [Reservation] to quickly respond to buyer invitations. Establish connections online efficiently and conduct precise offline negotiations!

Empowered by Smart Tap-to-Connect Signage for Efficient Sales Lead Acquisition

Equipping your booth with "Tap-to-Connect" smart signage helps you quickly obtain visitor information and capture sales leads, ensuring that every on-site interaction is converted into valuable customer data!

Wine Set Delivery Service in Wine & Spirits Exhibition Area

During the 114th CFDF, the organizing committee will provide different quantities of wine glasses, ice buckets, decanters, and other basic items free of charge to the exhibitors in the wine & spirits exhibition area, based on the different specifications of raw space and standard booths. If the items provided by the organizing committee for free cannot meet the needs of the exhibitors, the exhibitors can rent or purchase additional items at the on-site service office set up at the CFDF.

Service Object:

Exhibitors at the International Wine and Spirits Exhibition

Service Time:

Service Time: Start on March 25, 2026 at 13:00

Configuration Service Time: March 26-28, 2026, 08:30 - 17:00

Items begins to be cleared after 12:00 on March 28, 2026

Service Contact:

Exhibitors in need of rental or purchase services for wine set should contact the service provider of main venue of wine & spirits exhibition area:

Contact: Dong Zhuyan
 Phone: 13149171823
 Email: zhuyan.dong@chinapico.com

Configuration Standard of Item and Service Process

(1) Configuration Standard

Item Allocation List for the International Wine and Spirits Exhibition Area

Booth Specification	Allocation Standards (1 set per booth)	Security Deposit
Standard Booth B (9 m ² /set)	Per set: 6 wine glasses, 3 bags of ice cubes, 1 ice bucket, 1 trash bin, 1 spit bucket	300 CNY/set
Raw Space Booth (27 m ² /set)	Per set: 10 wine glasses, 5 bags of ice cubes, 2 ice buckets, 1 trash bin, 1 decanter, 1 spit bucket	500 yuan/set

Note:

A. The actual allocated quantity can be adjusted between categories according to needs. The types of wine glasses include red wine glasses, beer glasses, spirits glasses, champagne flutes, and disposable airline cups (10 pieces per group). One group of disposable airline cups is equivalent to 1 glass cup.

B. For both raw space booths and standard booths in the International Wine and Spirits Exhibition Area, wine utensils and other relevant items will be provided free of charge in accordance with the above standards. The user unit shall pay the security deposit as per the above standards.

C. Free cleaning and replacement services for the wine glasses within the above standard allocation are provided.

D. One set of trash bins includes 1 trash bin and 10 garbage bags.

E. If the exhibitor has no demand for item allocation, the Organizing Committee will not provide the allocation, and the security deposit is not required to be paid.

F. The allocation service is valid for three days (i.e., March 26-28, 2026).

(2) Compensation Standards for Configuration

Item	Degree of damage	Compensation amount
Wine glass	Damaged or lost	15 yuan/piece
Decanster	Damaged or lost	25 yuan/piece
Ice bucket	Stains or deformation Damaged or lost	20 yuan/piece 30 yuan/piece
Garbage bin	Damaged or lost	20 yuan/piece
Wine spitting bucket	Damaged or lost	20 yuan/piece

(3) Rental and Sale Items and Prices

Rental and Sale Price List

Item	Size, specifications	Rent	Deposit
Red wine glass	Suitable for wines	15 yuan/piece/session	50 yuan/piece
Champagne glass	Suitable for champagne	20 yuan/piece/session	70 yuan/piece
Whiskey glass	Suitable for spirits	10 yuan/piece/session	30 yuan/piece
Beer glass	Suitable for beer	5 yuan/piece/session	20 yuan/piece
Ice bucket	Stainless steel	30 yuan/piece/session	100 yuan/piece
Wine spitting bucket	Plastic	20 yuan/piece/session	70 yuan/piece
Garbage bin	Waterproof garbage bin with garbage bag	20 yuan/piece/session	70 yuan/piece
Decanster	Glass, flat top	25 yuan/piece/session	90 yuan/piece
Ice cubes	2kg per bag	16 yuan/bag	--

Note:

- Beyond the standard configuration, the cost of additional configurations is shown above; the companies need to pay their own rent and deposit;
- The organizing committee will prepare the rental and sale items in advance according to the demand, but the quantity is limited; the principle of first-application-first-use will be adopted until it is sold out.

4-2. Standard Booth Fascia Lettering Service

Submission of information for the B, C, and D category standard booth signboards, as well as the advertising visuals for the B category standard booth.

(1) Submission of fascia board information

Please log in to the CFDF exhibitor registration system before March 10, 2026, and fill in the complete fascia information after registration. The deadline for modifying the fascia information is March 10th. No modifications will be allowed after the deadline, and any modifications made will incur corresponding fees.

(2) Submission of standard B-class booth advertisement (Chengdu Century City New International Convention and Exhibition Center)

Exhibitors of Class B standard booths are requested to submit their advertising design (vector file: AI/CDR) before March 10, 2026 to:

Contact: Lan Xingpin
Phone: 13880376316
Email: 307283516@qq.com

Class B standard booth advertisement display dimensions:

Spray-painted display : 1 piece (455mm*2400mm)

Spray-painted display : 1 piece (430mm*2770mm)

Note: The location of the advertisement display can be found on pages 58-61 of the manual

(3) Overdue payment for the fascia board (due by March 10, 2026, the provider of the fascia board must pay separately for any overdue fees.)

Payment Standards:

Booth Type	Material	Price
Class B	Advertising design	200 yuan per booth
C, D class	Fascia board design	100 yuan per booth

Note:

1. The standard booth construction service provider will produce exhibitors' fascia boards together according to the sample format. The first letter of the English name is capitalized, and the English name of the limited company will be made in the format of CO., LTD. according to international conventions.
2. The exhibitor must submit the booth fascia board design to the organizing committee for unified production. Exhibitors are not allowed to produce or use their own signboards.
3. The booths located at the corners will have one less side wall and an additional fascia board.
4. When purchasing two or more booths, it is customary to remove the partition in the middle. If on-site modifications are required, additional charges will be charged, and the arrangement will be made based on the availability of manpower at that time.

Class C and D Standard Booth Renovation Application Instructions

- If any changes are required to the standard booths of class C and D, please visit the website of the main venue service provider to indicate them in the booth modification floor plan, or attach a separate drawing to indicate the location of the required facilities.
- Standard booths of class C, and D require approval from the main service provider for any modifications. Once approved by the organizer, the modifications can be implemented at the expense of the exhibitor. Removal applications are free of charge if being submitted before the deadline.
- Fascia boards will be uniformly produced by the Organizing Committee after submission by exhibitors, and exhibitors will not be allowed to make and use them on their own.

4-3. Price List for Electricity, Water, Internet, and Related Services

Chengdu Century City New International Convention and Exhibition Center

Receipt for electricity, water, internet, and related facility fees

Item	Specifications	Before or on March 13th (Special Price)	March 14th - March 19th (Original price)
Exhibition electricity supply	Construction electricity	416 yuan/location	499 yuan/location
	Electricity consumption during the exhibition period 15A/220V	608 yuan/location/ session	730 yuan/location/session
	Electricity consumption during the exhibition period 15A/380V	1,115 yuan/location/session	1,338 yuan/location/session
	Electricity consumption during the exhibition period 20A/380V	1,268 yuan/location/session	1,522 yuan/location/session
	Electricity consumption during the exhibition period 30A/380V	1,622 yuan/location/session	1,946 yuan/location/session
	Electricity consumption during the exhibition period 60A/380V	2,687 yuan/location/session	3,224 yuan/location/session
	Electricity consumption during the exhibition period 100A/380V	4,005 yuan/location/session	4,806 yuan/location/session
24-hour electricity	During the exhibition, 24-hour electricity is available (only for small appliances such as refrigerators, chargers, televisions, etc.), with an additional 50% charge on the standard fee; If the 24-hour electricity consumption exceeds 380V/63A, the exhibition period will be converted into 1 day for every 8 hours to charge the exhibition period electricity consumption fee.		

1. From March 20th onwards, an additional 50% fee will be charged for on-site temporary electricity applications based on the on-site declaration;
2. The arrangement period lasts 4 days, for each additional day of temporary electricity use, the cost will increase by 180 yuan;
3. For secondary connections, an additional fee of 130 yuan per connection will be charged;
4. For applications submitted on or before March 13, select the March 13 price; for those filed between March 14 and March 19, select the March 14 to March 19 price.
5. An additional installation connection fee of 130 yuan per outdoor electricity connection will be charged.

Municipal water supply with normal water pressure for general use	Water supply - DN20 (excluding material costs)	2,340 yuan/location/session
---	--	-----------------------------

1. The exhibition hall is only responsible for providing the connection service for water pipes and water supply facilities. The connection between the water pipes, materials, and the exhibitor's equipment, as well as the connection between the equipment and the drainage, are the responsibility of the applicant;
2. For applications made between March 20th and the start of the exhibition, an extra urgent fee of 50% will be charged on base of the aforementioned prices.

Exhibition hall network services	Fiber Optic 10M	1,984 yuan/location/session
	Fiber Optic 20M	2,646 yuan/location/session
	Fiber Optic 50M	4,823 yuan/location/session
	Fiber Optic 100M	8,268 yuan/location/session
	Fiber Optic 200M	13,780 yuan/location/session

For applications completed and paid by March 13 (inclusive), the above price will apply. For applications submitted between March 14 and the commencement date, an additional 50% expedited fee will be charged on top of the aforementioned price.

Note: Applications submitted on or after March 17 may not be fully processed.

Western China International Expo City

Receipt for Electricity, Water and Internet Fees

Item	Specifications	Before or on March 13th (Special Price)	March 14th - March 19th (Original price)
Exhibition electricity supply	Construction electricity	416 yuan/location	499 yuan/location
	Electricity consumption during the exhibition period 16A/220V	608 yuan/location/ session	730 yuan/location/session
	Electricity consumption during the exhibition period 16A/380V	1,115 yuan/location/session	1,338 yuan/location/session
	Electricity consumption during the exhibition period 20A/380V	1,268 yuan/location/session	1,522 yuan/location/session
	Electricity consumption during the exhibition period 32A/380V	1,622 yuan/location/session	1,946 yuan/location/session
	Electricity consumption during the exhibition period 63A/380V	2,687 yuan/location/session	3,224 yuan/location/session
	Electricity consumption during the exhibition period 100A/380V	4,005 yuan/location/session	4,806 yuan/location/session
	Electricity consumption during the exhibition period 200A/380V	8,011 yuan/location/ session	9,613 yuan/location/ session
24-hour electricity	During the exhibition, 24-hour electricity is available (only for small appliances such as refrigerators, chargers, televisions, etc.), with an additional 50% charge on the standard fee; If the 24-hour electricity consumption exceeds 380V/63A, the exhibition period will be converted into 1 day for every 8 hours to charge the exhibition period electricity consumption fee.

For applications completed and paid by March 13 (inclusive), the above price will apply. For applications submitted between March 14 and the commencement date, an additional 50% expedited fee will be charged on top of the aforementioned price.

Note: Applications submitted on or after March 17 may not be fully processed.

Receipt for Related Facilities Fees

Item	Specifications	Price
Special booth construction management fee	Indoor	20 yuan/m ²
Overtime management fee	18:00-24:00	3.5 yuan/m ² /h
	24:00-08:00	25 yuan/m ² /h
Site Restoration Deposit	50m ² or less (including 50m ²)	10,000 yuan
	51-99m ²	15,000 yuan
	100-199m ²	20,000 yuan
	200-299 m ²	30,000 yuan
	300m ² or more	60,000 yuan
Move-out certificate		0 yuan
Insurance	Each person is entitled to 1.5 million yuan per accident, with a cumulative total of 15 million yuan.	5 yuan/m ²
Mechanical dismantling and move-out	Unified dismantling of non-mechanical exhibition	29 yuan/m ²
Fire extinguisher rental	Fire Extinguisher	40 yuan/set
Flame retardant	Flame retardant	60 yuan/kg
Cleaning		400 yuan/person/day
Etiquette		700 yuan/person/day
translation		600 yuan/person/day

*Translation services are available only for English, Japanese, Korean, French, German, Russian, Italian, and Spanish. For detailed information on furniture, wine service, cleaning, etiquette, and translation services, please contact the curator.

1. Construction and installation outside the designated arrangement period is considered as overtime work. After clearing the area, re-entry for construction work will require an overtime work certificate.

During the arrangement period, if you wish to apply for overtime work until 24:00 on the same day, please complete the overtime procedure by 16:00 on that day according to the standard procedure. If you wish to apply for overtime work after 24:00, please complete the overtime procedure by 22:00 on the same day and pay the overtime fee according to the standard procedure.

2. For areas below 50m², the overtime fee will be calculated based on a 50m² area. For areas above 50m², the overtime fee will be calculated based on the actual area.

3. The starting time for overtime will be calculated as one hour if the overtime duration is less than one hour. Subsequently, it will be calculated on an hourly basis.
4. For raw space, advance access to the exhibition venue requires written consent from the organizing committee and the main service provider. And access to the venue can only be granted after the handover of the venue between the exhibition hall and the organizing committee has been completed.
5. Fire extinguishers shall be provided at a rate of 2 units per 50m², with 50m² or less counted as 50m² and above as the actual area, with an additional 2 units for every extra 50m².
6. Flame retardant shall be calculated at 1kg per 10m², with no application required for glass or wooden flooring.
7. The construction deposit for site preparation includes the fire extinguisher deposit and will not be charged separately.
8. If fire extinguishers are not returned after the exhibition, a deduction of 100 yuan per unit will be made from the construction deposit.
9. The number of setup and teardown permits per 5m² shall not exceed 1.
10. The listed prices for etiquette models are starting prices, while translation fees are in English.

Note: The hall will close at 17:00 on March 25th for fire inspection. No overtime will be allowed. The items listed in the fee schedule cannot be returned or exchanged once ordered.

4-4. Standard Booth Configuration and Instruction

1. Raw space booth configuration: Except for the raw space booths in the wine and international spirits exhibition areas (including national or regional pavilions), which have services for arranging items such as barware, raw space booths in all other exhibition areas have no configurations.
2. Standard booth configurations for class B, C, and D: (All renderings are for reference only, subject to the actual on-site setup)

Note: The standard booth is equipped with electricity for small appliances only, with a power limit of 300w. If you need to use high-power electricity, please apply separately.

4-5. Special booth design and construction

1. Instructions and Clarifications Pertaining to the Submission of Drawings

All drawings must be clear and complete, and the booth number should be clearly indicated in a prominent position on the drawings.

The circuit diagram must be clear and detailed. Specify the nature of electricity usage (mechanical equipment and lighting should have separate circuit switches and should not be mixed), total power, rated current and voltage of main switch and protection switches at each level (220V/380V), and specify the cable model and laying method used.

The circuit diagram indicates the location of the main distribution box for the booth. The circuit diagram also needs to indicate the type, power, and installation location of the lighting fixtures and other electrical appliances.

All the above-mentioned application materials must be filled out clearly and completely, and stamped with the official seal. Please submit the application through the "Home Service Channel" on the official website of the CFDF. After the application drawings are approved, please pay the relevant newspaper fees through the public bank account.

Legend: Note:

Structural construction drawings must include detailed drawings of load-bearing structures.

2. Requirements and regulations for construction management of raw space

Strictly follow the Production Safety Law of the *People's Republic of China*, *Fire Protection Law of the People's Republic of China*, *Regulations on Safety Management of Large-scale Mass Activities* and other laws and regulations. Follow the construction management regulations of the CFDF and cooperate with the supervision and inspection of the management personnel to ensure the safety of the booth structure and personal safety.

(1) Structural Safety

- ① The booth construction must not exceed the specified height and no form of two-story booth is allowed. Strictly adhere to the maximum height of 5 meter for raw space. No graphic fee will be charged for construction heights below or at 4.5 meters. A graphic fee of 10.00 yuan per square meter will be charged for booth construction heights between 4.5 meters and 5 meters (Include 5 meters). Class B, C, and D standard booths have a maximum height of 4 meters on raw space. Class A standard booths are not allowed to be modified in any form. If Class B, C, or D standard booths need to be renovated or self-built, the exhibitors must declare to the main venue service provider 15 days before the start of the exhibition. After the organizing committee agrees and the fees are paid, the declaration procedures for raw space requirements will be processed. The Organizing Committee has the right to refuse their admission if no advance declaration was made by exhibitors.
- ② The construction unit needs to design and construct according to the exhibition construction management regulations, provide construction drawings for review, and pay construction management fee and deposit of raw space. The projection of the booth built by the construction units should be within the line marking range on the ground. If it exceeds this range, the organizing committee and the venue service provider have the right to require the construction units to remove the exceeding part. The costs and responsibilities incurred shall be borne by the construction units.
- ③ The design and construction strength of the booth structure should meet the strength requirements necessary to bear the load, strictly following the safety regulations of the relevant national departments. The construction units should ensure that the overall structure of the booth has the strength and stability required to meet the load requirements. The steel structure material should comply with national standards, and the welding and connecting parts should comply with the safety requirements of relevant national departments.
- ④ The main wall thickness of the booth structure shall not be less than 150mm. The thickness of the floor made of light steel keel shall not be less than 8cm. The thickness of the wooden wall of the special booth without frame structure shall not be less than 35cm to ensure the contact area between the wall and the ground. Wooden walls with a height exceeding 3m must have square steel or seamless round pipes as internal supports. The single span of the wooden structure shall not exceed 6m. The single span of steel structure and mixed steel and wood structure (including steel lined square cylinder and iron frame) shall not exceed 8m. The back wall and front display section should be connected with steel structure. The lower part should be supported by steel columns and a base, with a base diameter of no less than 600mm. The supporting columns should not be directly erected above the platform, to ensure the overall strength and stability of the booth. Truss structures must use professional truss structures (factory design specifications or design drawings provided by qualified design units for reference), and it is strictly prohibited to use self-welded trusses; metal fasteners must be used between truss columns and beams, and they must be tightly fitted without gaps or instability.
- ⑤ All the raw space with top beams must provide detailed structural drawings of the connection between the beams and the main body. The structural strength should

meet the strength required by the load. The connection between the beam and the column must use bolts or other secure fastening materials. It is strictly prohibited to use the methods such as lead wire, iron wire, steel wire, etc. to overlap or bund for simple connections. The main components must be fastened with bolts and not with nails or wood screws. The lintel, ceiling beams, and wall must be connected using support structures or embedded within the wall to eliminate side connections.

- ⑥ If glass material is used to decorate the booth, tempered glass must be used (curtain wall glass thickness is not less than 10mm). The installation of the glass must be reasonable and reliable, and a metal frame must be made or professional hardware must be used for glass installation. An elastic material must be used as a cushion layer between the frame, hardware, and glass material to ensure the glass safety. Large glass materials should be clearly labeled to prevent injury from breakage. If the glass floor is used, the structural support columns and walls must be fixed underneath the floor, and the booth structure must not be built directly above the smooth glass surface to ensure structural stability.
- ⑦ The bottom of the main load-bearing steel structure column should be equipped with a weighted steel plate (with a diameter of not less than 600mm) to increase the stress area of the column and strengthen the stability of the booth. The column should use steel pipes with a diameter of 100mm or more and a wall thickness of 2mm or more. The size of the base of the metal structural column should be determined according to the overall load of the booth, and the column must be welded at the center position of the base. Weld the bottom chassis and weld the flange plate on top to increase the contact area of the connection points. It must be used as a whole pipe and cannot be spliced. The column cannot be placed directly on the platform and must directly contact the ground to increase the stability of the main body. Wooden load-bearing columns should be made of continuous solid materials to ensure structural integrity, and the joints should be kept securely connected. The diameter of the metal structure lamppost must be more than 10cm. The base must have an area of not less than 100cm×100cm and a thickness of not less than 6mm of counterweight steel plate, and be reinforced to ensure stability; wooden load-bearing columns should be made of continuous solid materials to ensure structural integrity, and the joints should be kept securely connected.
- ⑧ The angle steel, channel steel, square steel (pipe steel), and other materials used for load-bearing components must be qualified products and flexible metal materials or brittle materials used for decoration shall not be used. If angle brackets are used for profiles, the width of the angle brackets must be greater than 50mm, the thickness must be greater than 5mm, and steel bolts must be used for connection. Do not use thin-walled structural members with a wall thickness less than 0.8mm, and do not use heavily corroded structural members. The hanging component must be a metal frame and connected to the metal main structure using bolts.
- ⑨ During the exhibition, the construction unit must leave electricians, carpenters, and other personnel on duty at the site to promptly solve problems. In addition, the construction company should be obliged to inform those exhibitors who have electric boxes in their booth area, and should communicate with the exhibitors in a timely manner in case of power failure.

(2) Fire Safety and Electrical Safety

- ① The selection of materials for booth construction should comply with the national standards for the use of temporary building materials as stipulated by relevant national departments, and should be reasonably based on the characteristics of the exhibition, while also meeting national environmental requirements. In addition to the exhibits, all items used in the booth or other buildings (such as wall, carpet, floor, ceiling, light box, wall spray painting and other construction, decoration, decorative materials) shall be used in line with the relevant national departments approved by the non-combustible or flame retardant materials. The combustion performance level

shall not be lower than B1 (flame retardant level). The combustion performance level of the booth construction and laying carpet shall not be lower than B1 level (flame retardant level). For a small amount or partial use of combustible materials such as wood structure, top mesh cloth, etc., fire retardant treatment must be carried out (required to complete the treatment before entering the site), reaching B1 level (flame retardant level) can be used. It is prohibited to use polystyrene as a decorative material and it is prohibited to use elastic fabric, curtain fabric, yarn products, bamboo, straw, artificial green plants, and other flammable materials to decorate exhibition booths (even if they have undergone fire retardant treatment).

- ② It is strictly prohibited to set up exhibition booths (shelves) or stack various items and advertising materials in front of the fire doors in the exhibition hall. The opening and closing positions of the fire doors must be kept clear.
- ③ The booth must not obstruct the fire-fighting facilities, electrical equipment, emergency exits, and audience evacuation routes inside the exhibition hall. For the design and construction of the raw space booth, there must be two or more entrances and exits.
- ④ During booth construction, the carrying and use of flammable and explosive substances and prohibited chemicals (such as alcohol, thinners, gasoline, etc.) is strictly prohibited; carrying explosive items such as hydrogen cylinders, oxygen cylinders, acetylene cylinders, etc. is prohibited. It is strictly prohibited to use electric saws, electric planers, gas cutting, welding cutting, electric welding, electric drills, and other special construction operations indoors in the exhibition hall. Open flame operations are strictly prohibited in the exhibition area.
- ⑤ Except for temporary designated smoking areas, smoking is strictly prohibited in the entire exhibition area. Drinking alcohol and fire-related rituals are strictly prohibited, as well as the use of electronic spark devices.
- ⑥ After the exhibition ends every day, be sure to turn off the power supply of the booth except for the 24-hour electricity. The power supply and lighting power supply must be connected separately using different electrical boxes. The secondary electrical box must be connected to the lower end of the venue's electrical box, and equipped with corresponding specifications of leakage protection devices. The electrical box should be fixed in a location with low pedestrian flow and easy for staff to operate. It is prohibited to place the electrical box in an enclosed area.
- ⑦ Unauthorized connection of power and water sources is strictly prohibited, and it is strictly prohibited to overload electricity.
- ⑧ It is strictly prohibited to stack items near electrical boxes and switches. Insulation fire pads must be added to isolate electrical boxes and switches installed on booth structures.
- ⑨ The wiring of the booth must be enclosed in insulation pipes (such as PVC pipes or metal hoses). It is necessary to use regular wires that comply with national standards, and it is strictly prohibited to use non-standard materials such as twisted wires. Temporary electrical connections must use plugs. When connecting the construction branch of each booth, it is strictly forbidden to use insulating tape for direct wrapping. Plastic connectors and male and female terminal connectors must be used for connection, and insulation protection measures must be taken. The wiring of the wires must be standardized.
- ⑩ The maximum area of the booth ceiling must not exceed 50% of the leased booth area, and the ceiling material must be at least 15cm away from the lighting fixtures.

(3) Construction Safety

① Portable step ladders must not exceed 2 meters in height. Single ladder should not be used with padding, and steps must not be missing, and the spacing between steps should be 300mm. When using, it should form a 75-degree angle with the horizontal plane. It is not allowed to stand at the top of the ladder for work. Only one person is allowed to work on the ladder, and at least one person should be assigned to support the ladder. It is not allowed to stand on the ladder while it is being moved. The use of a ladder is not allowed on the scaffolding operating level. When using a ladder at a channel, there should be someone to hold it or set up a fence. Mobile scaffolding with complete and securely connected accessories must be used for heights exceeding 2 meters. The mobile scaffolding must pass the acceptance check and have a valid acceptance certificate before it can be used. It is prohibited to use any damaged, bent, severely rusted (affecting safety), modified, or other structurally damaged accessories. When using mobile scaffolding, the height of the scaffolding should not exceed 5 meters, and the height-to-width ratio should not be greater than 3:1. The construction load should not exceed 1.5kN/m². Protective guardrails should be set at a height of no less than 1.2 meters. The wheels of the mobile scaffolding must be securely connected, and the distance from the bottom of the column to the ground should not exceed 80mm. The walking wheels and guide wheels should be equipped with brakes or brake locks and other fixed measures. The load-bearing capacity of the walking wheels should not be less than 5kN, and the braking torque of the brakes should not be less than 2.5N·m. The operating platform should be kept vertical and should not be bent or deformed. The brakes of the walking wheels should be in a braking state except when moving. The scaffolding can accommodate a maximum of 2 people working at the same time, and at least 1 person should be assigned to support the scaffolding. If the bottom of the scaffolding has wheels, the foot brake should be locked to prevent movement. Operators must wear safety protective equipment (safety belt, safety helmet, tool bag, etc.) that meets national safety requirements when operating mobile scaffolding. When the height exceeds 5m, personnel must use qualified lifting vehicles for operations. Construction workers are prohibited from climbing or standing on exhibition booth shelves. Tools should not be thrown or passed during high-altitude operations. During high-altitude operations, construction workers must be fastened with a safety belt, and the safety belt should be hung on a sturdy component. At the same time, a dedicated person should be assigned to supervise and prevent other personnel from entering the high-altitude work area.

② The construction unit must have an on-site construction supervisor and wear an armband and ensure that each booth is equipped with a person who can follow up on the construction progress of the booth at any time and cooperate with the relevant work of the organizing committee in a timely manner. The registration should be done together when handling the construction procedures.

③ It is strictly prohibited to hang or bind booth structures and decorations on the top, pillars, fences, and various dedicated pipelines without authorization. Do not hang tiles (pieces), glass, and other hard surface materials on the main structure of the booth.

④ During the construction period, all personnel entering the venue must wear safety helmets (the construction company must provide safety helmets with LA logo and quality safety certification for exhibitors who have a need to enter the venue during non-exhibition periods) and carry construction documents. Construction workers must wear appropriate work clothes and other attire is strictly prohibited. Each booth must be equipped with a dedicated safety officer to supervise and manage on-site safety construction.

⑤ The on-site operators who connect all electrical appliances (including but not limited to electrical boxes, light fixtures, and sockets) must be electricians who apply in the early stage and should be checked whether they have certification for the job. Construction workers must carry professional protective equipment

(such as insulated gloves, insulated shoes, safety helmets, etc.) for their work. When using a ladder or scaffolding for electrical work or working near electrical lines, insulation protection measures should be taken on the metal ladder or scaffolding. It is necessary to ensure that construction personnel in each profession only engage in construction work within their own profession, and cross-profession construction and operations are strictly prohibited.

⑥ Wood structure preliminary processing is strictly prohibited in the exhibition hall, and large-scale spraying of paint, scraping putty, and brushing latex paint are strictly prohibited.

(4) On-site Order

① Raw space exhibitors must post their booth numbers in a prominent location on the structure (limited size: 350mmLx180mmH, booth number template provided by the main venue service provider).

② It is strictly prohibited to withdraw the exhibition in advance. No rough construction allowed. It is strictly prohibited to outsource construction and withdrawal of the exhibition to non-construction professional companies. Adhere to the principle of "who applies for the venue, who will build it", subcontracting is strictly prohibited.

③ After the construction area and booth are completed, it is necessary to post fire safety warning signs such as no smoking signs and safety evacuation route signs (200mm*300mm) according to regulations.

④ If the booth needs to be built on a platform and the height of the platform exceeds 10cm, a ramp must be used for the transition between the platform and the ground. For platforms with a height below 10cm, relevant step safety signs must be provided. When constructing the platform, it is necessary to set up an accessible passage from the platform edge within the booth area to the public passage, in order to prevent the height difference between the platform and the ground from causing personal injury. The corner of the platform needs to be equipped with collision prevention objects or a safety corner should be made.

⑤ Unauthorized construction or scaffolding is strictly prohibited without proper entry procedures. Similarly, unauthorized overtime work or non-compliant extended hours are strictly prohibited without proper overtime approval.

⑥ It is strictly prohibited to bring high-power chainsaws, planers, cutting machines, air compressors, and welding machines into the exhibition hall and construction site without the permission of the organizing committee.

⑦ During the arrangement period, it is strictly prohibited to use electricity for the exhibition period without application. If exhibitors apply for 24-hour power supply for their electrical equipment, they must post obvious signs to ensure that the power supply for their booths is free of any faults or hidden dangers, and they must also set up suitable and reliable maintenance switches.

⑧ The construction unit shall carry out construction within the specified time and area, and be responsible for fire prevention, theft prevention, and other safety work.

⑨ It is strictly prohibited to damage the facilities and equipment in the exhibition hall; it is strictly prohibited to drill holes, nail, paint, or color on the floor and walls of the exhibition hall; it is strictly prohibited to steal exhibition items.

⑩ When setting up a booth that is higher than adjacent booths, any excess should be treated with white leveling and beautification treatment on the back of the booth. It is strictly prohibited to arrange promotional text or company logos on the back. It is also strictly prohibited to use the structure of adjacent booths as the structure or support for one's own booth without permission.

⑪ If there are safety hazards in the construction of the booth, the construction

unit must rectify them in a timely manner after receiving the rectification notice issued by the main venue service provider. After the rectification is completed, the construction unit must promptly notify the main venue service provider to inspect the rectification results and make the order be cancelled.

⑫ During construction, the construction unit should clean up waste materials at all times. The materials used for building the booth should be neatly stacked, and it is strictly prohibited to occupy fire exits, ensuring clear passageways in the exhibition hall. It is strictly prohibited to set up storage facilities for personal belongings in the exhibition hall. The construction unit should remove the booth within the specified time, complete the garbage removal, and stacking and discarding the garbage in any public area is prohibited.

⑬ No provocation, fighting, or brawling is allowed at the exhibition hall. It is strictly prohibited to engage in personal actions such as self-defense without prior reporting to the relevant management department.

⑭ It is prohibited to discharge substances containing animal and plant oils, flour, cream, and other materials that can solidify into blocks in the exhibition hall. Exhibitors must package such items themselves with the assistance of the construction company and remove them from the exhibition hall's restricted area for disposal.

3. Rules for the Arrangement and Move-out Management of Raw Space

(1) Declaration Time

Advance declaration starts today.

(2) Required Application Materials

NO.	Item	Methods of Submission	Note
1	Copy of legal representative's ID card	Online	Must be sealed with an official stamp
2	Copy of business license	Online	Must be sealed with an official stamp
3	Work at Height Permit and Temporary Electrical Operation Safety Permit	Online	Please fill in completely and clearly, and stamp with official seal. Log in to concierge. pico.com/cfdf for download.
4	Raw Space Exhibition Booth Construction Entrustment Letter	Online	Please fill in completely and clearly, and stamp with official seal. Log in to concierge. pico.com/cfdf for download.
5	Safety Technical Disclosure	Online	Please fill in completely and clearly, and stamp with official seal. Log in to concierge. pico.com/cfdf for download.
6	Safety Education and Training Form	Online	Please fill in completely and clearly, and stamp with official seal. Log in to concierge. pico.com/cfdf for download.
7	Booth construction drawings	Online	Booth rendering, floor plan, elevation drawing, construction drawing, booth orientation drawing, circuit diagram, construction material specification drawing, power distribution system diagram, structural diagram (must be stamped with the seal of the construction company, indicating the model of construction materials and the connection method of structural details, the distance between the keels should not be greater than 40cm square, the thickness of the keel elevation should not be less than 10cm, the thickness of the keel material should be greater than 9mm, and the panel thickness should be greater than 5mm). These drawings should be clear and complete, and the circuit diagram should be marked with the circuit, load, specifications and models of the materials used (signed and stamped by the designer).
8	Water, electricity, network and related service prices list and special booth management standards receipt form	Online	Please fill in completely and clearly, and stamp with official seal. Log in to concierge. pico.com/cfdf for download.

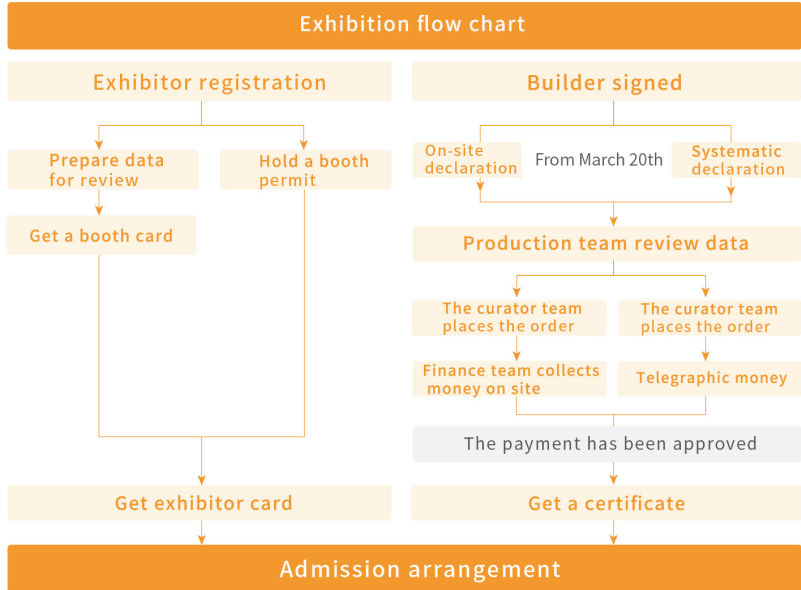

9	Order issued by the main venue	Offline	Need to be printed by the applicant and carried on site
10	Booth card (duplicate invoice of appointment of raw space contractor)	Offline	The exhibitor's official seal is required.
11	Original ID card of construction personnel	Offline	Need to be carried for on-site registration and application for the set-up and move-out exhibition cards

Note:

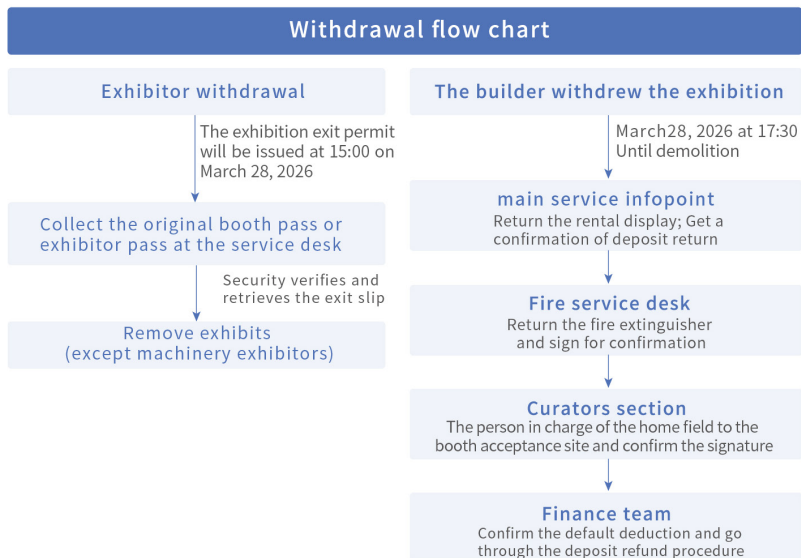

1. All the above documents that need to be submitted online should be submitted in the form of electronic documents.
2. Construction companies need to bring the above materials and carefully check the contents to prevent delays in construction due to registration procedure errors.

4-6. Booth Setup and Move-out Flowchart

(1) Exhibition flow chart

(2) Withdrawal flow chart

Description of Booth Card

The "Duplicate Invoice of Appointment of Raw Space Contractor" on the booth card is a necessary credential for the construction company to handle the construction procedures.

Exhibitors should fill in the relevant information in the "Duplicate Invoice of Appointment of Raw Space Contractor" clearly and in detail, and stamp it with the official seal, otherwise it will be invalid.

4-7. Special Booth Management Standards

This standard applies to construction companies providing building services within the scope of China Food & Drinks Fair.

(1) Safety of Building Structure

NO.	Project Name	Management Standards
1	The structure has serious safety hazards (does not meet the conditions for operation and can easily cause injury or death to personnel).	Deduct all deposit
2	There are safety hazards in the structure (such as the structural material being overloaded, the backboard wall not being sturdy, support columns deforming, contact surfaces not meeting standards, second-floor slabs, stairs, platform boards, etc. not meeting weight-bearing requirements, and uneven force distribution).	Deduct deposit of 3000 yuan
3	The large-span structure is not designed and constructed as required.	Deduct all deposit
4	The construction structure is built using inferior or substandard materials (subject to on-site construction safety inspection).	Deduct deposit of 3000 yuan
5	The steel structure connection is not standardized and the steel structures are not connected as required. (If welding should be used but not welded, bolt connection should be used but screw connection, steel rope should be used but wire connection, etc.)	Deduct all deposit
6	Booth structure collapses or burns.	Deduct all deposit
7	The glass of the booth has not been tempered, no collision warning signs posted on the glass and booth.	Deduct deposit of 2000 yuan
8	Construct the booth according not to the submitted drawings.	Deduct deposit of 3000 yuan
9	Project the booth beyond the ground line or the booth exceeding the specified height.	Deduct deposit of 2000 yuan
10	During the exhibition, the construction unit did not have electricians, carpenters, and other personnel on duty at the site, and did not promptly resolve exhibitor issues.	Deduct deposit of 1000 yuan
11	Other security matters not listed	Deduction of security deposit depending on the degree of safety hazard.

(2) Firefighting and electrical safety

NO.	Project Name	Management Standards
1	Smok in the exhibition hall or designated non-smoking areas.	Deduct deposit of 100 yuan per person.
2	Use flammable, explosive, and prohibited chemicals.	Deduct deposit of 4500 yuan.
3	Unauthorized connection of power and water sources.	Deduct deposit of 2000 yuan.
4	Exhibition materials without fire prevention and flame retardant treatment.	Deduct deposit of 3000 yuan.
5	The lightbox without pre-drilling ventilation holes.	Deduct deposit of 1000 yuan.
6	Unauthorized ignition.	Deduct all deposit
7	Installation of cables without conduit	Deduct deposit of 1000 yuan.
8	Failure to post safety fire warning signs as required.	Deduct deposit of 1000 yuan.
9	Circuit connection not using terminal blocks.	Deduct deposit of 1000 yuan.
10	Occupy fire exits with stored items	Deduct deposit of 1000 yuan.
11	Not isolate flammable building materials effectively from electrical appliances and cables, and not install leakage switch.	Deduct deposit of 3000 yuan.
12	The ceiling of the booth is against the regulations	Deduct deposit of 2000 yuan.
13	Not configure enough fire extinguishers at specified locations.	Deduct deposit of 1000 yuan.
14	Obstruction of fire service installations and fire escape routes in exhibition halls.	Deduct deposit of 2000 yuan.
15	Use twisted pair and non-standard cables.	Deduct deposit of 2000 yuan.
16	During the construction and operation period, the power supply was not disconnected after the closure of the venue.	Deduct deposit of 1000 yuan.
17	The construction unit of the booth is not equipped with a fully compliant secondary power control cabinet, which has a rated current higher than the primary power provided by the exhibition hall, or the power installed within an closed room.	Deduct deposit of 1000 yuan.

(3) Construction Safety

NO.	Project Name	Management Standards
1	Construction site without wearing a safety helmet.	Deduct deposit of 100 yuan per person.
2	Non-standard dress at the construction site.	Deduct deposit of 200 yuan.
3	Special operations personnel work without a license	Deduct deposit of 2000 yuan.
4	On-site initial processing, large-scale spraying, putty work	Deduct deposit of 2000 yuan.
5	High-altitude operation was not carried out as required (including but not limited to not using qualified scaffolding, no one watching, not wearing safety belts, multiple people working, etc.)	Deduct deposit of 500 yuan.
6	Rough construction and move-out, unauthorized construction, failure to establish a safety zone.	Deduct all deposit
7	Unauthorized use of the exhibition hall structure for lifting and bundling operations.	Deduct deposit of 2000 yuan and rental fees.
8	Failure to comply with construction safety management regulations.	Deduct deposit of 1000 yuan.
9	Outsourcing the move-out to a non-construction professional company	Deduct all deposit

(4) On-site Order

NO.	Project Name	Management Standards
1	Fighting and brawling	Deduct deposit of 4000 yuan.
2	Enter the construction site without identification or if the person and the identification do not match.	Deduct deposit of 100 yuan.
3	Bring a cutting machine, welding machine, electric saw, and air compressor into the construction site without permission.	Deduct deposit of 1000 yuan.
4	Unauthorized overtime work	Charge double for actual overtime pay.
5	there is no beautification on the booth higher than the adjacent booths	Deduct deposit of 1000 yuan.
6	Unauthorized use of power for the exhibition period during the arrangement period.	Add 75% on top of the on-site price.
7	Entering the venue without the admission.	Deduct deposit of 3000 yuan.
8	Damage to exhibition hall equipment and facilities.	Compensate according to the price
9	Misappropriation of exhibits	Deduct deposit of 2000 yuan.
10	Refusal to sign the rectification notice.	Deduct all deposit
11	Failure to comply with regulations and withdraw the exhibition in advance.	Deduct all deposit
12	The booth platform has not been set up with an accessible passage.	Deduct deposit of 1000 yuan.
13	Incomplete decoration garbage removal or placing decoration garbage in public areas.	Deduct all deposit
14	The booth number is not posted in a prominent position on the special booth structure.	Deduct deposit of 500 yuan.
15	Failure to comply with the above unlisted regulations of CFDF.	Deduct deposit of 2000 yuan.

(5) Maintain Venue Items and Facilities

Project Name	Specifications	Unit	Price	Note
Ground damage	1m×1m	Place	2000	
Wall damage	1m×1m		1500	Damage, paste or color
Glass damage		Block	5000	Calculate by area
Drilling in the wall, floor, pillar or ceiling		Place (unit)	760	
Distribution room socket box door		set	300	
Power distribution box		set	1000-5100	Determine based on the extent of damage.
Small distribution box		set	200-2200	Determine based on the extent of damage.
fluorescent lamp fixture	3×40w	set	800	
Spotlight	150~30w	piece	100	Determine based on the extent of damage.
Sanitary facilities			200-3400	
Fire extinguisher box			4080	
Fire hose			4080	
Underground telephone module			400	
Exhibition board		piece	150	
Standard exhibition display				According to the purchase price, compensation shall be made at the original price.
Other				According to the purchase price, compensation shall be made at the original price.

Note: In case of any violation, in addition to deducting the deposit according to the above standards, the violators must rectify immediately and unconditionally as required. Otherwise, for the violators who refuse to rectify or rectify it improperly, the organizing committee has the right to require them to leave the venue.

4-8. Site Restoration Deposit

Collection Standard, Payment and Refund Method of the Clean Construction Deposit

- (1) Each exhibitor must pay the corresponding clean construction deposit (including cleaning, construction and fire safety guarantee deposit) before entering the venue for construction.
- (2) The deposit shall be remitted to the account of the main venue service provider designated by the organizing unit, and the payment voucher and additional booth information shall be sent to each organizer by email or uploaded to the online order system for financial confirmation.
- (3) Deposit refund method: If no violation of regulations occurs, the main venue service provider will uniformly refund the deposit within 30 working days after the conclusion of the exhibition.

Methods of deposit payment:

Chengdu Century City New International Convention and Exhibition Center

For booths 1-9 (clean construction deposit):

- Payee: Beijing Pico Exhibition Management Co., Ltd.
- Bank: DBS Bank (China) Co., Ltd. Beijing Yongdingmen Sub-branch
- Bank account number: 671100000013
- Account number: 000000501511364232

Remarks:

- (1) Please clearly indicate the booth number and exhibition name when remitting the deposit.
- (2) After payment, please upload the payment voucher to the online order system for financial confirmation. The deposit will not be accepted if remitted in the name of an individual. If the deposit cannot be returned in the later stage due to remittance in the name of an individual, you shall bear the responsibility yourself.

Western China International Expo City Venue

For booths 1-16 (clean construction deposit):

- Payee: Shenzhen Kastone Exhibition Co., Ltd.
- Bank: SPD Bank Shenzhen Qianhai Branch
- Bank account number: 310584000330
- Account number: 79350078801400003776

Remarks:

- (1) Please clearly indicate the booth number and exhibition name when remitting the deposit.
- (2) The deposit will not be accepted if remitted in the name of an individual. If the deposit cannot be returned in the later stage due to remittance in the name of an individual, you shall bear the responsibility yourself.

Note: When making payment, please indicate the corresponding booth number + exhibition name, and upload the payment voucher to the online order system for financial confirmation. The deposit does not accept remittance in personal name; the consequences of remitting in personal name resulting in the inability to refund the deposit in the later stage are at your own risk.

Attachment Receipt

Attachment 01: Raw Space Exhibition Booth Construction Appointment Letter

The 114th China Food & Drinks Fair Raw Space Exhibition Booth Construction Entrustment Letter

Hereby, the exhibitor of the 114th the China Food and Drinks Fair, with booth number _____, covering an area of _____ square meters, hereby entrusts _____ as the exclusive booth contractor. We hereby pledge to the organizer of the China Food and Drinks Fair, COFCO Exhibition (Beijing) Co., Ltd.:

- I. This company has been confirmed as the only filling construction company for this exhibition booth after passing the inspection and review, and it has the qualification for construction and erection in the exhibition industry;
- II. Our company has signed a relevant construction contract with the contractor, and urged them to purchase relevant insurance to ensure the safe and normal construction of the exhibition booth.
- III. Our company has a thorough understanding of the relevant construction management rules for the the China Food and Drinks Fair Area, and has instructed the contracted construction company to strictly adhere to the management regulations and comply with the management arrangements.
- IV. Our company will cooperate with the organizing committee, safety supervisors, and main venue service provider in overseeing the safety of the exhibition stands. If the contracted construction company violates the relevant construction safety regulations of the exhibition hall, the organizing committee has the right to deduct the security deposit paid by them according to the regulations.
- V. Our company will strengthen supervision over the construction company. If we violate the relevant regulations on construction management in the China Food and Drinks Fair Area and the regulations on volume control during the exhibition period, our company agrees to accept the punishment from the organizing committee of the China Food and Drinks Fair and the main venue service provider, deduct the relevant breach of contract deposit, and bear the corresponding consequences.
- VI. To maintain the trading order of the fair, exhibitors are required to make the following commitments:
 1. Comply with relevant provisions of national laws and regulations
 - (1) The qualification materials submitted to the organizing committee for participation in the exhibition are true, legitimate, and valid.
 - (2) The exhibits must comply with the provisions of relevant laws and regulations such as the Food Safety Law of the People's Republic of China. Exhibits must comply with national standards and industry standards, and must not include counterfeit or infringing products. There are no dangerous goods, items with unsafe factors, or any exhibits that violate the laws, regulations, and rules of the People's Republic of China among the exhibited products.

- (3) Advertising and promotion comply with the relevant requirements of the Advertising Law of the People's Republic of China and do not conduct illegal advertising.
- (4) Strictly comply with the relevant provisions of laws and regulations, and display the business license (and other relevant qualification documents) during the exhibition period.

2. Comply with the relevant management requirements for participating in the China Food and Drinks Fair.

- (1) we will strictly adhere to the Exhibitor Manual and various management regulations of the China Food and Drinks Fair.
- (2) The actual exhibitors must be consistent with the booth contract and the submitted qualifications. No unauthorized splitting or transfer of booth is allowed. No combining of booth is permitted. The exhibits must be identical to what is listed in the exhibition application materials. If there is any unauthorized change, transfer, sharing, or combining of exhibition spaces, the organizing committee has the right to cancel our company's exhibition qualification and impose a penalty of sealing the exhibition. Any economic losses incurred will be borne by ourselves.
- (3) We will strictly adhere to the designated time for booth setup, display, and move-out as specified by the China Food and Drinks Fair. We will uphold the overall image of the fair and refrain from moving out ahead of schedule. We will strictly follow the unified replenishment schedule set by the China Food and Drinks Fair, and will not conduct replenishment during the exhibition period. Prior to replenishment, we will complete the necessary procedures and follow the specified time slots and designated entrances for replenishment. When carrying items outside the exhibition area, we will comply with the regulations for exit management and provide and submit the required exit permit as requested.
- (4) We will be solely responsible for the safekeeping of exhibits and personal belongings during the exhibition period. We will arrive at the booth on time when the exhibition opens and not leave until all visitors have left after the exhibition closes. All valuable exhibits and belongings will be taken and stored by ourselves when the exhibition closes. We will ensure the proper storage to prevent any loss or damage of other exhibits and related items. Otherwise, if any loss or damage occurs, we will take full responsibility by ourselves.
- (5) We will strictly adhere to the China Food and Drinks Fair's regulations regarding volume control. A designated personnel will be responsible for controlling the volume during the exhibition, ensuring that the speaker volume remains below 80 decibels. During the design and construction phase, speakers will be directed towards the inside of the booth. If any violation of the regulations occurs, we will accept the relevant measures taken by the organizing committee of the CFDF (it is recommended to use directional sound systems to control the sound field range and avoid affecting neighboring exhibitors). We will not occupy public passageways at the fair, refrain from performing vulgar shows, refrain from hiring individuals to parade with signs inside the exhibition hall, and will not post or display any advertisements without permission from the organizing committee of the CFDF;
- (6) We will strictly adhere to the China regulations regarding intellectual property rights management. We will not infringe upon the intellectual property rights of others and not display any infringing products. We will carry the relevant documentation of our company's intellectual property rights during the exhibition. We will cooperate actively

with the organizing committee of the China Food and Drinks Fair and the relevant intellectual property rights management departments in case of any related complaints. If any infringement is confirmed, we will immediately cease the display of infringing exhibits;

(7) We will strictly adhere to the China Food and Drinks Fair's regulations on construction safety management. We will not use unsafe materials and not adopt unsafe construction plans. We will strictly supervise our construction company to avoid any safety accidents and ensure the safety of our booth construction. If any safety accidents occur due to our company's reasons or inadequate supervision, we will bear the related responsibilities, with no involvement of the organizing committee of the China Food and Drinks Fair or the main venue service provider.

3. To ensure a favorable trading environment, our company strictly adheres to the following points:

- (1) We will not use amplifiers or other sound reinforcement equipment. We will keep the volume below 80 decibels to reduce noise and maintain a peaceful environment;
- (2) We will not distribute promotional materials outside the designated area of our rented booth. We will avoid using signs, human advertisements, or any other mobile promotional activities; We will not post promotional materials on public areas or commercial advertisements;
- (3) We will not organize any performances or activities that may disrupt the order of the exhibition;
- (4) We will not adopt any improper advertising or promotional methods that may harm social morality. We will ensure that our display conforms to public order and good customs. Staff members will dress appropriately;
- (5) We will maintain cleanliness and hygiene of the exhibition hall and our booth;
- (6) We will avoid any disputes with the booth construction unit or any third-party entities. Any unresolved matters related to this will be handled by ourselves in a proper way to prevent any situation that may affect the order of the China Food and Drinks Fair.

4. Strictly comply with the requirements of the China Food and Drinks Fair regarding exhibits

Our company will strictly adhere to the following regulations, otherwise, we unconditionally accept the organizing committee's measures such as booth closure, immediate withdrawal from the exhibition area, and unified management of non-compliant exhibits.

- (1) All exhibits are pre-packaged and the purpose of participating this fair is not for retail. No on-site retailing will take place.
- (2) The following products are prohibited from being exhibited: various medicinal herbs, unpackaged beef jerky, loose tea leaves, amber and jade products, jewelry and silverware, belts and clothing accessories, toys, daily necessities, as well as retail-oriented products such as Kopi Luwak, donkey-hide gelatin, roasted duck, roasted chicken, alcoholic beverages and so on.
- (3) Exhibits do not infringe upon any intellectual property rights, do not involve any gray areas, suspected infringements, intellectual property disputes, or infringement complaints. They must not be counterfeit or substandard products, or products without production dates, quality certificates (or production permits), and manufacturer

information or expired products that violate any laws or regulations.

(4) Exhibits comply with the scope of the China Food and Drinks Fair and do not cross exhibition categories. The range of exhibits does not exceed the scope specified in our company's product inventory list (the detailed list of exhibit items is as follows, and can be attached on a separate page):

(1)

(2)

(3)

(4)

Product photos (if there are a large variety of exhibits, please attach the photos on a separate page with paging seal).

If we violate the above commitments, we are willing to unconditionally accept any handling measures imposed by the main organizing unit and relevant departments, and shall bear all legal liabilities and handling expenses arising from such violations on our own.

*Translation services are available only for English, Japanese, Korean, French, German, Russian, Italian, and Spanish. For detailed information on furniture, wine service, cleaning, etiquette, and translation services, please contact the curator.

1. Construction and installation outside the designated arrangement period is considered as overtime work. After clearing the area, re-entry for construction work will require an overtime work certificate.

During the arrangement period, if you wish to apply for overtime work until 24:00 on the same day, please complete the overtime procedure by 16:00 on that day according to the standard procedure. If you wish to apply for overtime work after 24:00, please complete the overtime procedure by 22:00 on the same day and pay the overtime fee according to the standard procedure.

2. For areas below 50m², the overtime fee will be calculated based on a 50m² area. For areas above 50m², the overtime fee will be calculated based on the actual area.
3. The starting time for overtime will be calculated as one hour if the overtime duration is less than one hour. Subsequently, it will be calculated on an hourly basis.
4. For raw space, advance access to the exhibition venue requires written consent from the organizing committee and the main service provider. And access to the venue can only be granted after the handover of the venue between the exhibition hall and the organizing committee has been completed.
5. Fire extinguishers shall be provided at a rate of 2 units per 50m², with 50m² or less counted as 50m² and above as the actual area, with an additional 2 units for every extra 50m².
6. Flame retardant shall be calculated at 1kg per 10m², with no application required for glass or wooden flooring.
7. The construction deposit for site preparation includes the fire extinguisher deposit and will not be charged separately.
 8. If fire extinguishers are not returned after the exhibition, a deduction of 100 yuan per unit will be made from the construction deposit.
9. The number of setup and teardown permits per 5m² shall not exceed 1.
10. The listed prices for etiquette models are starting prices, while translation fees are in English.

Note: The hall will close at 17:00 on March 25th for fire inspection. No overtime will be allowed. The items listed in the fee schedule cannot be returned or exchanged once ordered.

Clean Space Booth Management Standard Receipt Form

This standard applies to construction companies providing building services within the scope of China Food & Drinks Fair.

(1) Safety of Building Structure

NO.	Project Name	Management Standards
1	The structure has serious safety hazards (does not meet the conditions for operation and can easily cause injury or death to personnel).	Deduct all deposit
2	There are safety hazards in the structure (such as the structural material being overloaded, the backboard wall not being sturdy, support columns deforming, contact surfaces not meeting standards, second-floor slabs, stairs, platform boards, etc. not meeting weight-bearing requirements, and uneven force distribution).	Deduct deposit of 3000 yuan
3	The large-span structure is not designed and constructed as required.	Deduct all deposit
4	The construction structure is built using inferior or substandard materials (subject to on-site construction safety inspection).	Deduct deposit of 3000 yuan
5	The steel structure connection is not standardized and the steel structures are not connected as required. (If welding should be used but not welded, bolt connection should be used but screw connection, steel rope should be used but wire connection, etc.)	Deduct all deposit
6	Booth structure collapses or burns.	Deduct all deposit
7	The glass of the booth has not been tempered, no collision warning signs posted on the glass and booth.	Deduct deposit of 2000 yuan
8	Construct the booth according not to the submitted drawings.	Deduct deposit of 3000 yuan
9	Project the booth beyond the ground line or the booth exceeding the specified height.	Deduct deposit of 2000 yuan
10	During the exhibition, the construction unit did not have electricians, carpenters, and other personnel on duty at the site, and did not promptly resolve exhibitor issues.	Deduct deposit of 1000 yuan
11	Other security matters not listed	Deduction of security deposit depending on the degree of safety hazard.

(2) Firefighting and electrical safety

NO.	Project Name	Management Standards
1	Smok in the exhibition hall or designated non-smoking areas.	Deduct deposit of 100 yuan per person.
2	Use flammable, explosive, and prohibited chemicals.	Deduct deposit of 4500 yuan.
3	Unauthorized connection of power and water sources.	Deduct deposit of 2000 yuan.
4	Exhibition materials without fire prevention and flame retardant treatment.	Deduct deposit of 3000 yuan.
5	The lightbox without pre-drilling ventilation holes.	Deduct deposit of 1000 yuan.
6	Unauthorized ignition.	Deduct all deposit
7	Installation of cables without conduit	Deduct deposit of 1000 yuan.
8	Failure to post safety fire warning signs as required.	Deduct deposit of 1000 yuan.
9	Circuit connection not using terminal blocks.	Deduct deposit of 1000 yuan.
10	Occupy fire exits with stored items	Deduct deposit of 1000 yuan.
11	Not isolate flammable building materials effectively from electrical appliances and cables, and not install leakage switch.	Deduct deposit of 3000 yuan.
12	The ceiling of the booth is against the regulations	Deduct deposit of 2000 yuan.
13	Not configure enough fire extinguishers at specified locations.	Deduct deposit of 1000 yuan.
14	Obstruction of fire service installations and fire escape routes in exhibition halls.	Deduct deposit of 2000 yuan.
